THANK YOU TO OUR SPONSORS

Waipapa
Taumata Rau
University
of Auckland

The toys thought that they had friends for life in each other, but they realize playtime is over when their best friend, Andy, disappears and rides off to the University of Auckland to study engineering! They must team up and figure out a plan to get there, blend in, and most importantly, bring Andy back home. But, when they finally have a handle on their task, they must face off against perils beyond their imagination. Will the toys be able to overcome all the challenges that come between them and Andy? Will they fly through it all and be successful in their mission? And will they all make it out of this in one piece, or will they lose parts of themselves in the process!

HAL CONSULTING
LIMITED

Who we are

HAL Consulting Limited (HAL) is a New Zealand-based niche consultancy specialising in three waters management. From our modelling-focused beginnings we have grown to now offer a comprehensive suite of services ranging from technical detail to strategic thinking – and the ability to communicate the complexities involved to a wide range of technical and layman audiences.

What we do

We offer technical excellence across a full range of hydraulic modelling applications, analysis of data from a variety of sources (including SCADA, GIS, flow gauging and rainfall), assessing System performance assessment and project/programme conception to address identified issues, development of high-level strategies to guide long-term three-Water management and infrastructure planning.

DIRECTOR'S GREETING

OH NO!! The engineers are coming- " up with another stage show yet again!

Welcome one and all to the Engineering Revue, a place full of mystical, magical, child-like wonder, and fun. A place where you can witness a year's worth of our cast and crew's efforts (sweat, blood, and tears) to put on the best show filled with disproportionate props, funky costumes, hot dances, and many special surprises! A special thanks to you, our wonderful audience, whose laughter, entertainment, gasps, and heckles are what make our efforts worth it. We hope you enjoy the show (and it was worth your money) as much as I enjoyed directing it and we enjoyed creating and performing it, so without further ado, enjoy the Engineering Revue 2025 show!

-Sama Kattaya

PRODUCER'S GREETING

To Skycity... and beyond! Many hands have made this show light work (aha..), and I cannot even give enough thanks for all the work that helped this show come alive.

To our talented, hardworking and hilarious cast and crew, thank you for all the time, effort and love for this show. To our exec team - we made it! Thanks for going through every overtime meeting, W2M, and tiring late nights with me. Thank you to HAL, our sponsor, for your generous support! Massive thanks to the Engineering Faculty for letting us use like, all the rooms, to SkyCity for being the best hosts, and to Sama and Sonia for being my darling babes. And massive thanks to you, dear audience, for cheering for us and supporting us. We hope you love the show as much as we do!

-Ashley Jubelag
